

Wahyu Kharisma Mujiono
iOS Software Engineer

SUMMARY

Hello, myname is wahyu and I'm Passionate iOS Developer with good eye for design who is extremely passionate about learning. I'm always in constant pursuit of expanding my knowledge with every opportunity I get, because I believe there is always room for improvement.

PROJECTS

Quuk

September 2020 – November 2020

Quuk is a grocery organizer app that I develop together with my team at developer academy as our final challenge, and it's the first app I put on the app store. I definitely met some challenges when building it, but I gained experience with **SwiftUI** and **Networking**, we use **CoreData** to make persistence data in local storage then parsing the data into **JSON** and make **Https Request** GET/POST to the database using **RESTful API**. We also add some extra features like Push Notification with **OneSignal**.

jusChat

jusChat is a chat app that allows a user to chat with other users, its using **Firebase Cloud Firestore** as the persistence layer and **SwiftUI 2.0** for the interface. Implementing the **Anonymous Authentication** and prove that data is properly separated for each user.
